João Moreira

Android Developer | AOSP | Kotlin | Java

Póvoa de Varzim, Portugal • moreira.jc90@gmail.com • linkedin.com/in/moreirajc • github.com/omoreirajc

Experience

Critical Techworks — Porto, Portugal
Fullstack Android Developer — *February 2023 - January 2026*

- Worked on the evolution of **User Management and Personalization** within BMW's **Android Automotive platform**, adapting existing components to newer Android versions while maintaining backward compatibility.
- Worked across **AOSP and application-level** functionalities related to **user onboarding, login, main/guest profiles, and user switching**, supporting their integration and consistent behavior across the platform.
- Investigated **Android framework and application-level defects**, identifying root causes and coordinating with cross-functional teams to support issue resolution and software stability, following **Agile practices** and using **Jira**.

Esports Talent — Portugal
Broadcast caster — *2015-2023*

- Contributed to the Portuguese esports community as a broadcast caster and commentator for **Counter-Strike** and **Valorant**, covering national and international competitive events.
- Provided live commentary and analysis across major esports competitions, developing strong **public speaking, communication, improvisation, and analytical skills**.

Skills

- **Technical:** Kotlin, Java, Android SDK, AOSP, Android Automotive, Jetpack Compose, Clean Architecture, MVVM, REST, JUnit, MockK, Mockito, UI Testing, Agile, Scrum, Jira.
